INTRODUCTION

Introduction

SETA is an advanced platform developed to simplify and optimize the selection process of air treatment products in the HVAC sector (Heating, Ventilation, and Air Conditioning), developed by OCRAM-clima®.

What it allows

- ✓ Create different projects with the necessary equipment.
- ✓ Configure and customize equipment based on specific technical parameters.
- ✓ Choose solutions adapted to regulatory and performance requirements, including energy efficiency, noise levels, airflow, and compliance with standards.
- ✓ Obtain detailed documentation, such as technical datasheets, assembly diagrams, and performance analyses.
- ✓ Compare different solutions to find the ideal balance between cost, efficiency, and sustainability.

SETA stands out by integrating advanced calculations, such as analysis and pressure drop losses, with an updated product database, making it an essential tool for mechanical engineers, designers, and HVAC professionals seeking accuracy and efficiency in air treatment system selection.

ACTIONS

Actions

Create a profile

To access SETA, visit ocram-seta.com and enter your login details.

If you don't have an account yet, click on "No account? Register" and fill in the following fields:

Username

Email

Password

Communication language

Country

VAT

Before completing the registration, read and accept the Terms and Conditions and Privacy Policy, then click "Register."

You will receive an email to confirm your registration and a second email once the SETA team validates your profile.

After approval, simply enter your username and password whenever you want to log in.

View the profile area

To access your profile, click on “My Profile” in the upper right corner of the page.

In this section, you can view the following information:

 Username

 Email

 VAT

 Country

 User Type

 Account Status

Change password

To change your password, go to “My Profile,” enter your current password, and set a new one.

Change language

You can change the software language at any time. To do this, go to the upper right corner of the page and select one of the available options:

PT Portuguese

EN English

FR French

Select products

To choose your products, click on “Selector” in the menu on the left side.

On this page, you can select the desired product range. Each range displays an illustrative image and a brief description of its function.

KT Pro

When selecting the KT Pro range, you must enter the product’s technical values as specified in the project’s technical specifications.

After entering the data, click “Search.” Products that match the specified criteria will be displayed. Choose the one that best suits your needs, then select the physical characteristics of the equipment and any desired extras.

NPS® Master

For the NPS® Master range, simply select the following parameters:

Airflow

Equipment access side

Installation type (indoor or outdoor)

After defining these options, click “Search” to obtain the most suitable equipment recommendation.

VBox

For the VBox range, start by selecting which model you need: VBox AC or VBox EC.

Select the desired filter and enter the airflow and pressure drop values for the extraction. Finally, define the access side and, if necessary, choose the desired extras.

At the end, click “Add” and select the project where the product should be integrated.

Create projects

To add equipment, you first need to create a project.

You can create a project in two ways:

After selecting a product, you can add it to an existing project or create a new one:

Click "Create New Project" .

Choose a name for your project.

Or through the following steps:

Go to the "Projects" section.

Click "Create New Project".

Choose a name for your project.

After creating the project, you can add the desired equipment.

Request technical datasheets

To obtain technical datasheets for the products, go to the relevant project.

In the project's product list, you can view all the products, their quantities, and the icons to download the technical datasheet or remove the product from the project.

Request quotes

To request a quote, click on "Request Quote" at the bottom of the project page.

The sales team will analyze the request and contact you with the total project quote.
